Metrics Analysis of
Ethnic Sunday and Advanced
Teaching Sessions

2004 – 2011

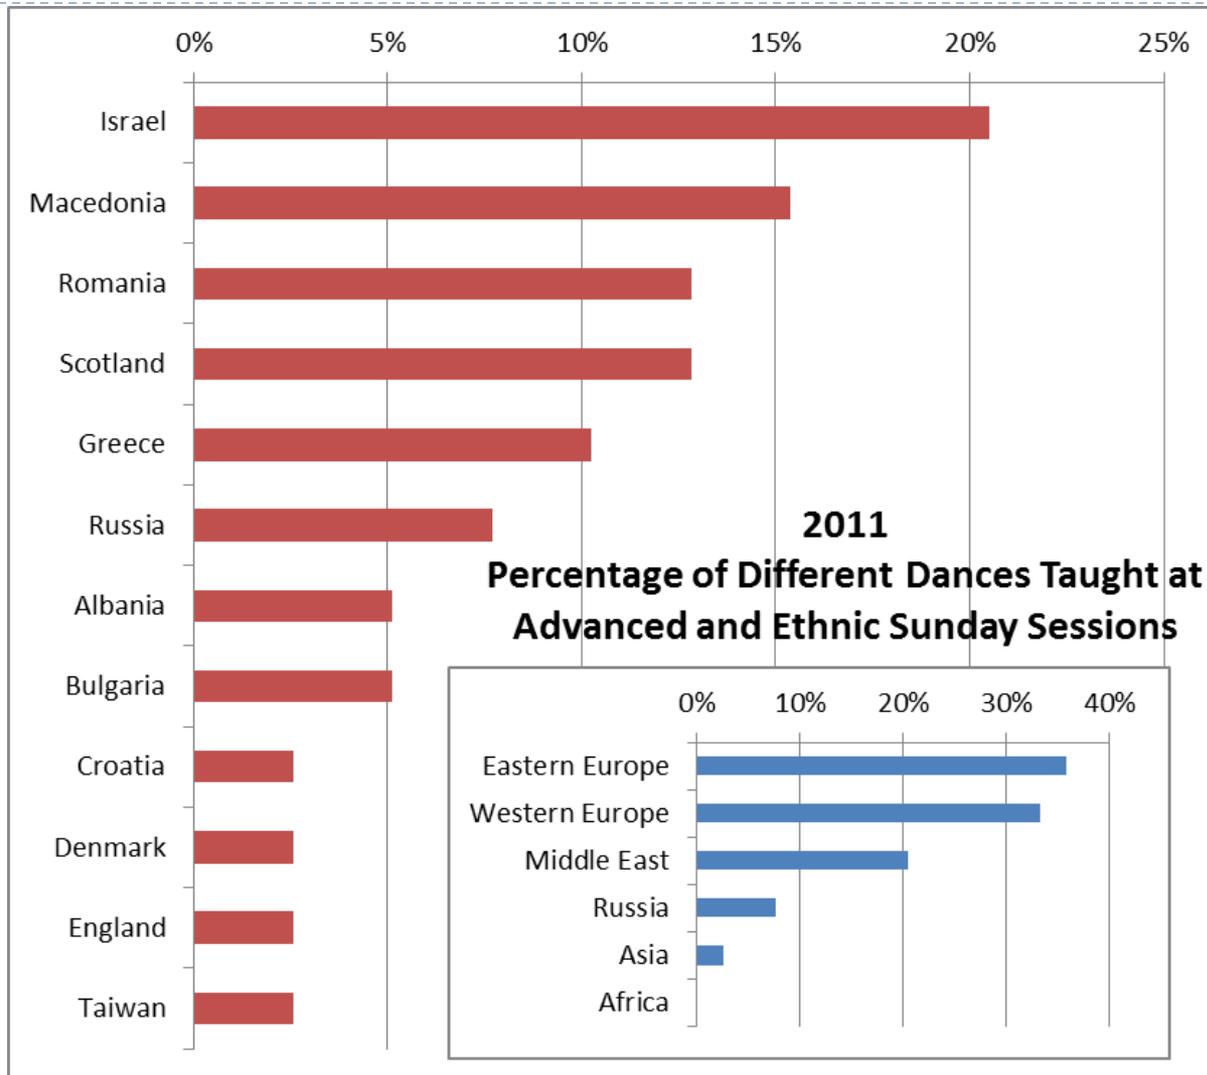

All Years By Country

- ▶ Unusually large percentages for Israel in 2004 & 2005 seem to skew it's overall percentage
- ▶ Although individually, Eastern Europe countries are not as strong, when added together, they represent a sizable percentage of teaching.

All Years

- ▶ One might wonder why fewer dances were taught in 2008 & 2009.
- ▶ When compared to the Non-Partner to Partner percentage, it makes sense.
- ▶ It takes more time to teach couple and set dances.
- ▶ The reduction in 2011 probably reflects the decision to discontinue 9 pm teaching on the last Thursday of the month.
